

THE SPOT IN CABARETE

Thanks to the countless possibilities to have fun on the water, Cabarete offers the right holiday program for everybody, no matter if kitesurfers, windsurfers or surfers, beginners or experts, and no matter if on the water or on land.

WIND AND WAVES

The wind is moderate in the morning and gains strength at midday under the influence of the trade wind. From May - October the wind blows mainly side shore from the right with an average strength of 4-5 bft. From November - April the wind blows mainly cross offshore from the right and is less constant, but can deliver around 4m high waves at the reef. The reef is about 800 m off of the beach and offers the ideal conditions for wave beginners and wave experts. Flat water sailors get their money's worth in the area before the reef, while beginners and intermediates feel comfortable in the small standing area located directly in front of the center. We have a mobile kite school so it is always possible to choose the perfect spot depending upon the wind and wave conditions as well as the needs of the student. Surfing in Cabarete is a hot alternative for all windsurfers and kitesurfers. The beginner spot is only 5 minutes away from the center, and directly in front of the Velero Beach Hotel there is a great spot for intermediates. On top of all this we also organise excursions to the famous and well-loved spot of Encuentro.

THE CENTER

The center is located upwind of the 2 km wide bay of Cabarete, together with the Bic Surfshop and the Eze Restaurant/Bar in Plaza Carib Wind. The center sits beneath shady palm trees, is very cosy, and offers a chill-out area overlooking the ocean - only 30 m from the shore. Right in front of the center there is an easy access for windsurfers of all levels as a reef belt stops any shore break. The wind close to the beach is very stable, as there are no obstacles in the background and therefore no wind shadow. Thanks to the fact that the bay is protected by land on both sides and that our team keeps an eye on you, you are very safe.
