

Wellness, Thalasso and Spa

Tunisia is the northernmost country of the African continent and Djerba with its 514 km² is the largest island of North Africa. Its vegetation of palm trees, pomegranate and olive trees as well as fig cactuses with spiny fruits and cactus figs, is what Djerba is especially famous for. With 1.2 million date palms, it is also referred to as "Palm Island". The climate is moderate and sunny and the northern coastline has long beautiful beaches which not only attract many bathers but even more water sports enthusiasts. Djerba airport is only about 30 minutes by car away from our center in the north of the island. A drivable dyke connects the island with the mainland and also supplies Djerba with drinking water. The Djerbans are extraordinarily hospitable and open-minded people with a keen sense of business and they attach great importance to their customs and traditions. Visit the palm island Djerba and let yourself fall under its charm!

THE SPOT ON DJERBA

Djerba is no high wind destination, but the spot is perfect for windsurfing beginners and intermediates, as well as kitesurfers of all levels and catamaran sailors. A shallow water area, between 20-50 meters (depending upon the tide), allows an easy launch. The spot is divided into different zones, with the section directly in front of the center intended for windsurfers and catamaran sailors. A designated area further downwind is reserved for kitesurfing tuition, right next to it advanced kitesurfers find ample space for cruising. Both of the hotels offer an excellent kids club, enabling families to have a perfect water sports vacation on this dream-island. Djerba is the right place for those looking for a short travel time and moderate winds to improve and enjoy!

WIND AND WAVES

During summer the wind blows moderately but constantly from the east (cross-onshore from the right), making Djerba a very safe spot for everybody. The best time for beginners is definitely during the summer months between June and September. On days with stronger winds and waves, windsurfing beginners will be challenged, whilst advanced windsurfers and kitesurfers have a ball. For kitesurfing tuition there is a second spot which is a shallow water lagoon, making Djerba a perfect all-year learning environment for kitesurfing beginners. In spring and autumn, the wind blows between 4-6 beaufort.

THE CENTER

The Club Mistral & Skyriders center is located in front of the Radisson Blu Hotel, in the northern part of the island on the large and clean hotel beach. It is equipped with warm water showers and a nice chill out area. As the wind is not so strong in Djerba, catamaran sailing is a great alternative to windsurfing and kitesurfing. The Joker Voucher allows you a flexible choice between the 3 sports, for rental and also for lessons. Our second new and smaller Skyriders center is located at the kite lagoon, and we use this as a storage place so you always have the right equipment on hand.
